

CASE STUDY

Part Analytics' Supply Chain Sourcing Platform

AI-powered – and delivered as a cost-effective SaaS solution - Part Analytics' Supply Chain Sourcing Platform can help EMS companies optimize their costs and mitigate production delays in an increasingly competitive marketplace. Our solution delivers a host of benefits, including:

Faster time to market

Lower materials costs

More flexible scheduling

Enhanced customer service

Improved profit margins

And much more!

Why Part Analytics

Part Analytics' platform integrates and enriches our customers' data to provide insights on cost and risk reduction opportunities. The platform's different modules help our clients see different workflows and use cases for their clients. This gives our clients the ability to:

- Achieve faster turnaround times for quoting than the competition
- Automatically monitor key components' cost
- Gain real-time insights into compliance and alternative parts availability
- Enjoy enhanced risk management on long-term and obsolete components

Our Clients' Results

Our platform has enabled our clients to achieve significant improvements in their sourcing operations. This has included:

- Reduce Direct Material Cost - typically up to 20%
- Sourcing Automation - BOM Analysis reduced from 2 weeks to less than a day
- Smarter, Faster RFQ Process - Bid on 20 to 30% more RFQs
- Better control of RFQ pricing and purchasing costs

Part Analytics' AI-powered supply management solution is designed to help your EMS company better serve your customers. **Schedule a demo** to see what our strategic sourcing can do for you.
